# THE NEW ALTO SCAFFOLD STAIRWAY BALUSTRADE

EN 12811  
COMPLIANT  
FOLDING  
BALUSTRADE  
UNIT FOR  
STAIRWAY  
APERTURES

# THE NEW ALTO SCAFFOLD STAIRWAY BALUSTRADE UNIT

The Alto Stairway Balustrade safely closes off stairway apertures using compliant 1m guard rails and 0.5m intermediate rails, full toe boarding and a self-closing spring loaded gate.

Designed to be used in conjunction with our Fixed Scaffold Stair unit & handrail unit, the set gives a complete, compliant solution to stairway access and aperture protection where stairways are within a working scaffold structure as opposed to a separate stair tower.

The Alto Balustrade is simple to install and requires only a scaffolders spanner to fix the unit to the scaffold board at the base. Telescopic braces with spring-loaded hooks ensure the correct positioning of the unit whilst holding the unit secure.

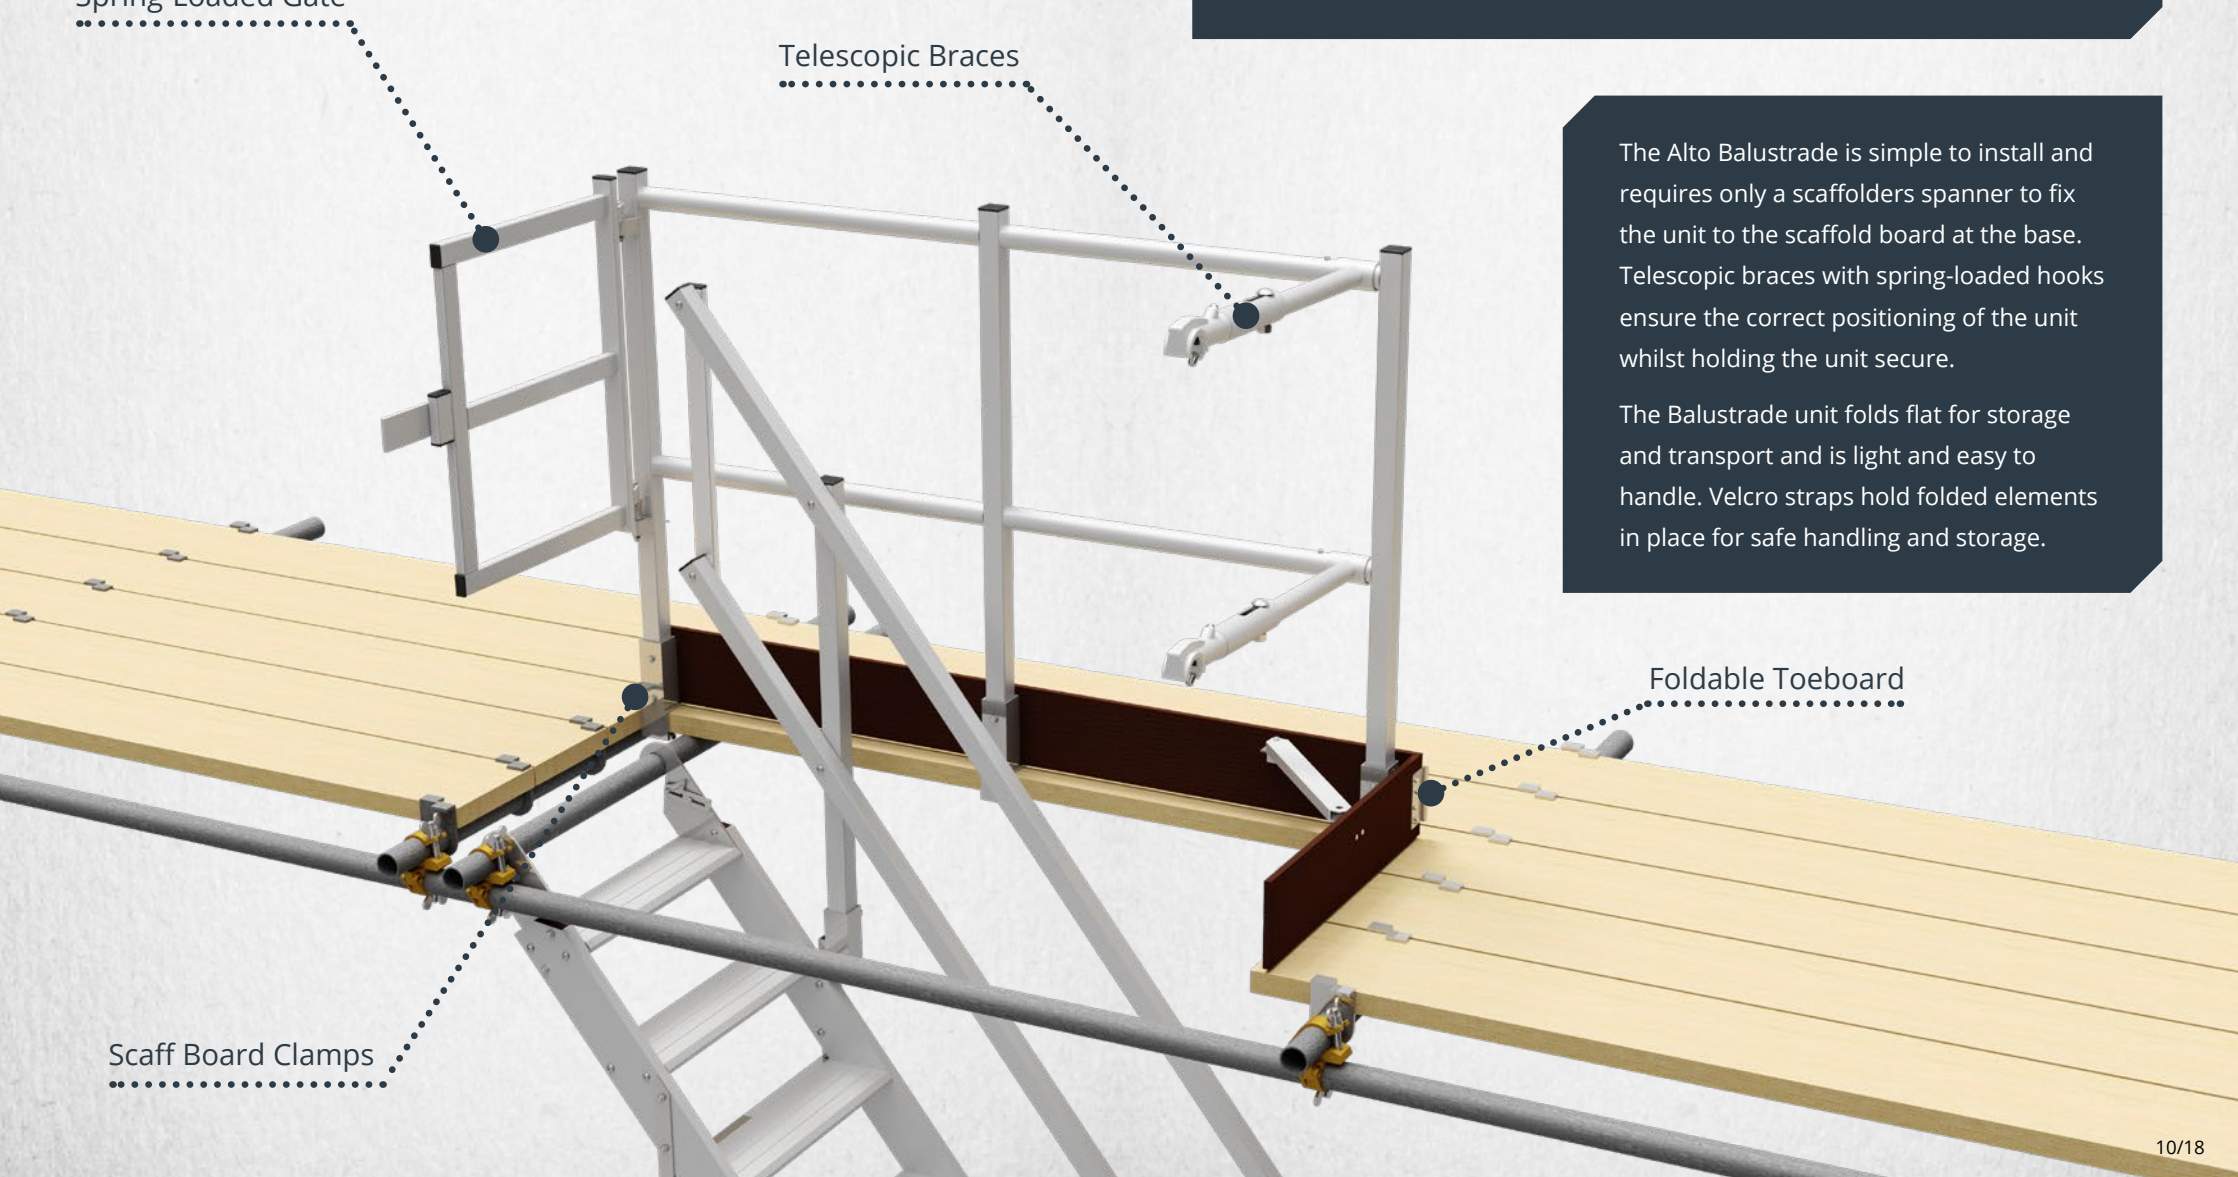

The Balustrade unit folds flat for storage and transport and is light and easy to handle. Velcro straps hold folded elements in place for safe handling and storage.

# MAKE THE SAFEST CHOICE

- ▶ Designed to give a complete solution to guard-railing stairway apertures within working scaffolds
- ▶ Spring loaded brace hooks and locking mechanisms make deploying the Alto Balustrade a simple operation
- ▶ Made to fit 48 mm scaffolding and requiring only a podger to install or remove, the Alto Balustrade is compatible with existing standard scaffold equipment
- ▶ The built in self-closing gate means one less item of equipment to be required on site
- ▶ Made of structural grade aluminium and high grade phenolic coated birch ply, the Alto Balustrade is lightweight, corrosion resistant and durable
- ▶ Guard rails are automatically set at 1 metre and 0.5 metre heights
- ▶ The Alto Balustrade folds flat for storage, handling and transport with Velcro straps to hold elements safely in place
