STEP-UP DEVICE
FOR SCAFFOLDERS**

THE NEW ALTO SCAFFMATE ONE

The Alto Scaffmate One is an all-aluminium access platform to allow scaffolders to safely erect and dismantle scaffolding. Usable at any point along the guardrail, the Alto Scaffmate provides a convenient, secure, slip-resistant hop-up platform position that gives additional reach to help install or remove scaffolding.

- › 6kg Unit Weight
- › 1m Operating Height
- › 50mm Height Adjustment
- › Compact, foldable design
- › Durable construction
- › Slip resistant working platform
- › Spring locking pins at connections

THE NEW ALTO SCAFFMATE DUO

The Alto Scaffmate Duo has the added flexibility of 2 working platform heights. Unlock the lower half of the ladder and fold away to use the Scaffmate for 0.5m heights, removing the need for carrying 2 types of hop-up components.

- › 7kg Unit Weight
- › 0.5m & 1m Operating Height
- › 50mm Height Adjustment
- › Unique 2-height foldable design
- › Durable construction
- › Slip resistant working platform
- › Spring locking pins at connections

MAKE THE SAFEST CHOICE

- ▶ Aluminium construction for light weight and easy handling.
- ▶ Ladder folds and latches flat for ease of carrying and storage.
- ▶ 0.5m and 1.0m heights when using the Scaffmate Duo eliminates the need to carry two pieces of equipment.
- ▶ Quick release auto-latch brace hooks lock onto the scaffolding guardrail and prevent unintentional removal.
- ▶ Swivel feet accommodate minor surface imperfections and provide a secure footing.
- ▶ 50mm adjustment in ladder stiles provide a level platform for both system and tube & fitting scaffolds.
- ▶ Slip resistant all aluminium platform with generous 540mm x 405mm area gives a safe working platform.
- ▶ Platform automatically latches in open and closed positions for secure and safe utilisation.
- ▶ Ladder folds and automatically latches to safe parked position when in use as 0.5m step on the Scaffmate Duo.
